Sir:

In reply to the January 29, 2003, Office Action, please amend the above-identified application as follows:

IN THE CLAIMS:

Please cancel claims 1 and 3 without prejudice to or disclaimer of the subject matter contained therein.

Please replace claims 2, 10-12 and 14 as follows:

(Amended) A spread illuminating apparatus in which a square transparent ubstrate is provided close to a surface of a liquid crystal panel and said liquid crystal panel is illuminated through said transparent substrate by a bar-like light source which is provided parallel with a side surface of said transparent substrate, wherein a plurality of straight groove portions are formed directly on a surface of said transparent substrate intersecting one another obliquely with respect to four sides of said transparent substrate so as to reflect light toward said liquid crystal panel. (cot
